

SPRING IS HERE

Bubb Insurance is dedicated to making sure that your interests become our interests. Please take the time to review this friendly reminder and contact our office if you should have any questions or need to make any changes.

Smoke Detectors: Changing the batteries in all of your smoke detectors will help alert your family in the event of fire or smoke.

Fire Extinguishers: having a fire extinguisher handy on every floor of your home can help you put out a fire from the start. Check the date your device was last serviced or purchased.

Roof: Make sure that there are no curling, buckling, or missing shingled areas. These conditions left unattended can cause your roof to leak.

Gutters: Check the spouting around your house. Cleaning your gutters will help rain water flow more freely and help prevent the backup of water inside and out.

Brush: Trimming the brush around your home helps ensure your dwelling and structure to be safe from falling branches and debris. Also, cutting the brush against your home can deter unwanted visitors who can hide in the brushes around your property.

Home Improvements: Updating your electrical systems, plumbing, roof, and heating systems helps keep the life of your home working to its full potential. It also improves the value. Please let us know if you have done major improvements to your home or if you have added other structures to your property.

Door Locks & Alarm Systems: Double check your locks from the inside and outside. Properly working locks can help protect your family and keep those out that need not be in. Most insurance companies will also allow a discount for local and central burglar alarms. Please contact our office if you have a burglar alarm so that we can make sure your policy reflects these discounts.

Jewelry: Keep all expensive items in a safe place. Fire boxes and safety deposit boxes are a great place to store those irreplaceable items. Give our office a copy of the most recent appraisal for those diamonds, precious stones, antiques and furs and schedule those bigger items to ensure replacement.
